## About

I have excellent organization skills, while being able to communicate articulately, clearly to the point both verbally and written. I am an advanced computer user with a long history of successful projects.

With understanding of MYSQL databases, PHP, and PERL; its possible to do a wide variety of projects with ease. I also have experience with ImageMagic and manipulation of graphics in PHP.

My experience includes the system administration at the command prompt of CentOS 7 servers and the configuration of systems that run Internet services.

Ask to see my websites and see what I can do for your business!
